How the math works

Buying a $1.5M business

10% down ($150K). $1.35M 7(a) at 10% over 10 years.

≈ $17,840 / month

Business needs ~$270K/yr cash flow (1.25 coverage).

Short on cash? Seller note

Seller carries up to half the down payment ($75K here) if it's on full standby for the life of the loan.

$75K down instead of $150K

Buying a $3M building (504)

$300K down · $1.5M bank · $1.2M SBA fixed · 25 yrs

≈ $19,500 / month

Build equity instead of paying rent.

504 bank loan coming due

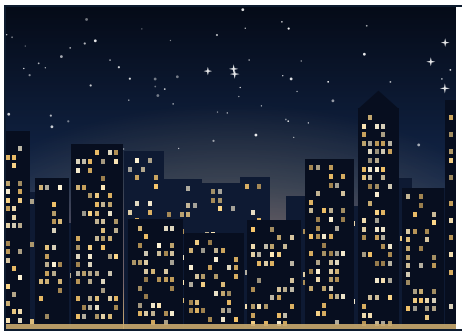

$2M over 25 yrs: ~$10,557/mo at 4%. At 7%:

≈ $14,136 / month

About $3,600 more. Plan 6–12 months ahead.

New rules to know

- Most business purchases again require about a 10% equity injection (SOP 50 10 8).
- A seller who keeps any ownership must personally guarantee the loan for 2 years.
- As of March 2026, owners must be U.S. citizens or U.S. nationals.
